General safety instructions

- Before installation, read the installation instructions attached. Read carefully through all the steps of the installation. We advise you to save the instructions, the invoice and the warranty sheet. To enforce a claim, you will need the product number, invoice number and date of purchase. If possible, save the packaging and the enclosed template, too.
- Make sure to prevent getting fingers caught between the door, especially if children are involved!
- Be careful not to place your hands into the area with moving parts!
- Do not try to repair the mechanism by yourself – consult an authorised professional or send an e-mail at service@woodrive.eu.
- Do not use the mechanism outdoors or in rooms with a high humidity level!
- Use the mechanism indoors only!
- The mechanism should not be exposed to water.
- Use the mechanism only for the intended purpose – for sliding doors!
- Do not place the mechanism near flammable objects!
- Make sure that children do not play with the mechanism.
- Open and close the door without using excessive force!
- Cleaning and maintenance works should not be performed by children younger than 8 years old.
- Keep the area where the door with the mechanism opens and closes free from objects that may obstruct the movement of the door leaf.
- Perform regular checks to confirm that the components of the mechanism are firmly attached.

Operating

- After properly installing the manual WooDrive M mechanism, it is operated by manually pulling the sliding door leaf.
- End points (end point of the open and closed position - stoppers) are determined based on the room where the mechanism is placed.
- Open and close the door without using excessive force.

Cleaning and maintenance

- Before cleaning, make sure that the door leaf with the mechanism is fixed and will not move!
- Exterior parts of the mechanism can be cleaned using a damp cloth.
- Do not use aggressive and abrasive detergents!
- Perform regular checks to confirm that the components of the mechanism are firmly attached.

Environmental protection instructions

WooDrive M is an ecological product with the majority of components being natural and long lasting. After the end of its useful life, return the product to the address below if possible, because the components can be reused and recycled if they are in good condition. This way you can make a significant contribution to environment protection.

Raduha 56,
3334 Luče ob Savinji
Slovenija

Otherwise, the product should be disposed of at a wood, metal and plastic recycling facility.
